

Blackjack

Playing the game

- Press on a chip to select it. Press on the hand position. Press on the chips to increase your bet. Every press on a chip increases your bet by the chip value.
- You can press **Clear Bets** to remove all bets from the table.
- Pressing **Double** doubles the bets you have placed on the table.
- Press the **Deal** button to deal the cards. Two cards are dealt to the player and the dealer hands. The cards are dealt one by one to each hand in turns, with the first card going to the player hand. The last card goes to the dealer hand and is dealt face down.
- If the dealer's face up card is an Ace, you are offered insurance. Press the **Insurance** button to insure against the dealer having Blackjack.
- Use the **Hit**, **Stand**, **Double** and **Split** buttons as required.
- The dealer reveals the face down card and draws additional cards according to the rules.
- Your hand is compared to the dealer's hand.

Split

If your first two cards have the same point value, you may split them into two separate hands by placing a second bet equal to the original bet. You then proceed to draw cards. You may draw as many cards as you like on each split hand, but if you split two aces, you receive only one additional card for each ace. If you receive an ace and a ten-value card in a split hand, it is counted as 21 and not Blackjack.

Double

After you are dealt two cards, and think that another card will allow you to beat the dealer's hand, you can increase your bet by an amount up to your original bet or "double" your bet. Your wager is doubled, and you are allowed to receive one more card.

Insurance

If the dealer has an Ace as his up card, you'll be given a chance to buy insurance. When you buy insurance, you're betting that the dealer has a blackjack. It allows you to try and protect yourself when you think that the dealer may have Blackjack. When buying insurance, you place half of your initial bet by pressing the Insurance button. If the dealer does have Blackjack, you are paid 2 to 1 on your insurance bet. If the dealer doesn't have Blackjack, you lose your insurance bet.

Winnings

	Pays
Winning Hand	1 to 1
Insurance	2 to 1
Blackjack	3 to 2
