

Bonus Poker

Two deal poker game, where we can play even on four tables, regarding to the bonuses it is familiar with the CLASSIC POKER game which is also in this packet. The game is played with 52 cards without joker on each table.

Playing the game

With the BET button the value of one deal is adjustable on one table. The HOLD5 button sets the number of the tables/rows. By pressing the START the price of the game – the value if the bet multiplied by the number of tables – is deducted from the CREDIT. The first deal is always on the first table (the lowest row). The given winning combinations are automatically held by the program, but the player can change it. If the player plays on multiple tables the held cards copied into the other playing rows. If there is no held, then the next deal will be the first deal. In the second deal new cards will be dealt into the not held places in the first row, and into the empty spaces the above rows. The valuation happens by rows, the base of the prize is the bet on one table. The first deal can be accepted by the player (with the BET button), it is not mandatory to have a second deal. The bonus rewards triggered by any bonus combination on any table. The reward is transferable to the doubling game.

BONUS of 4

This bonus is displayed by a magic number in the BONUS 4 field, the default values is 5. This means, to achieve this bonus reward a poker combination is required from fives. With this bonus poker the player wins the fivefold of the normal poker reward. After this in the BONUS 4 field the number changes to 6, and then this bonus is achievable by a six poker. The reward is equal of the six fold of a normal poker price. This number then increases to 7, 8, 9 and to 10. If the 10 bonus is won, the prize is tenfold of the normal poker reward and the BONUS 4 counter returns to its default value, five and the game continues in this order.

BONUS of 3

The value of these bonus rewards are displayed on the lower left part of the screen the BONUS 3 field: which is $3 \times \text{“magic number”} \times \text{BET}$. Under it there are 10 squares with numbers and red arrows. The player can win this BONUS 3 during the “3 of a kind” reward with the magic numbers. After each bonus reward (all of them must be 6 card), in the square fields the highest number is replaced by a red arrow. As soon as all numbers are replaced throughout to one with arrows, then the colour of the reward row is changed to red and the bonus reward increased as many times as the magic number. After the bonus prize is changed to this higher value, all of the red arrows are removed and in the square fields the numbers from 10 to 1 appears in a descending order. This bonus is directly depends from the number in the BONUS 4 field, if the sum of this number is 10, then the increased bonus will be the three collected reward: $3 \times 10 \times \text{BET}$.

Bets and reward multipliers

The lowest and highest limit of the selectable bet is adjustable by the operator. To see the Paytable press the HOLD4 button or on dual screens it is displayed on the second monitor. Examples of the various prizes are displayed on the information screen, this can be called by pressing the HOLD4 button or it is on the second monitor.
